ML2021Spring HW5 Report

<醫學工程所一> <卓嘉虹>

<r09528018 >

Public Score	Private Score
29.79	28.86

The methods I used to pass the strong baselines include:

1. Back-translation
2. Increase model capacity(parameters) after combining "mono" dataset:
   encoder_embed_dim = decoder_embed_dim = 512,
   encoder_ffn_embed_dim = decoder_ffn_embed_dim = 2048,
   encoder_layers = decoder_layers = 8
3. Train 60 epochs and use averaging.
